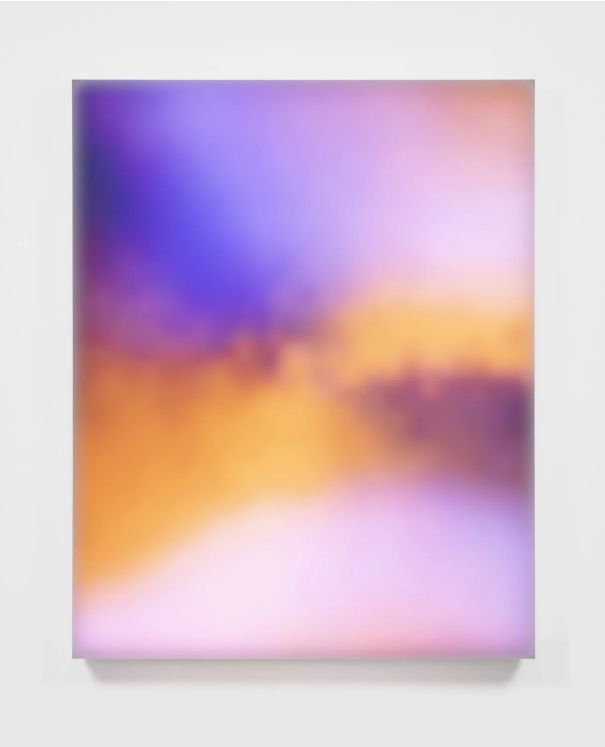
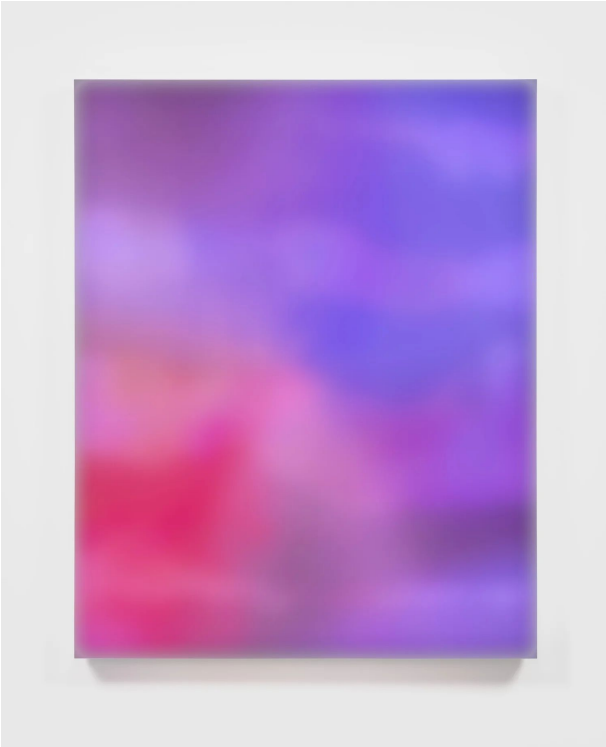
Final Projects Pitch

Jana Dimikj

Leo Villareal

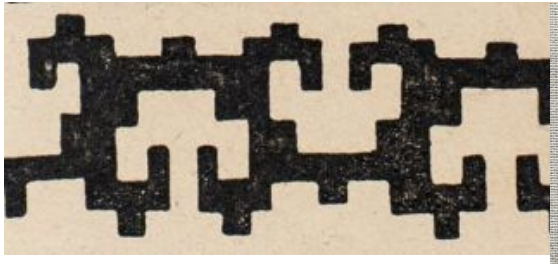


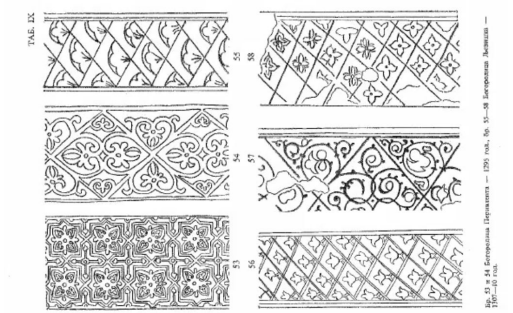


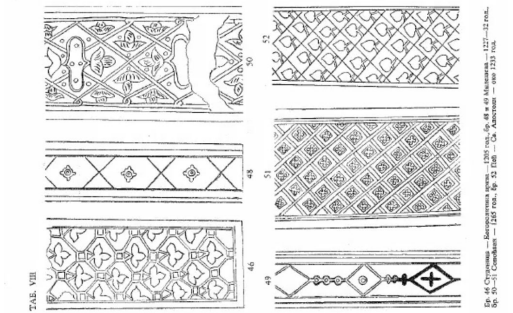
Controlling an RGB LED
p5*
Particle

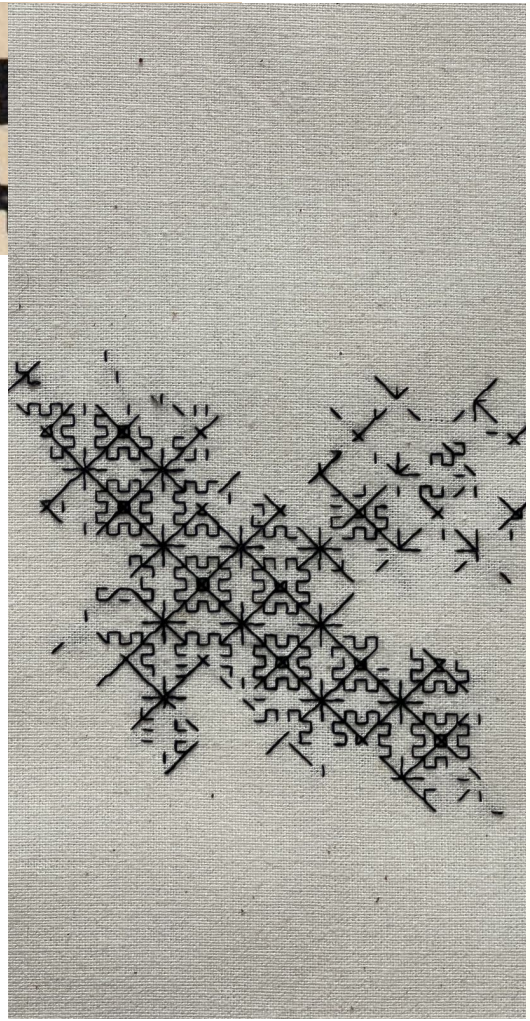
I will be creating a ceiling light and sending the p5.js animation as video feed to control the LEDs inside.

GENERATIVE EMBROIDERY
MAKING OF "TREE 138"









сл. 2. Орнаменти са српских средњовековних фресака (12-15. век)

fig. 2 Ornaments from Serbian medieval frescoes (the 12th to the 15th century)

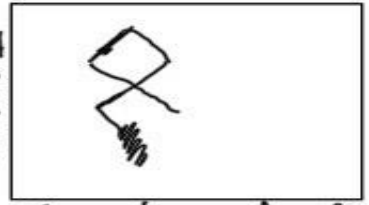
Themes: Surveillance, Memory, Distortion

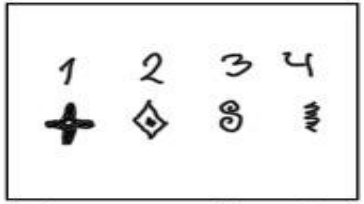
TITLE/SCENE:

PAGE:

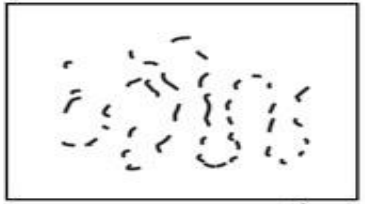
OPTION 1



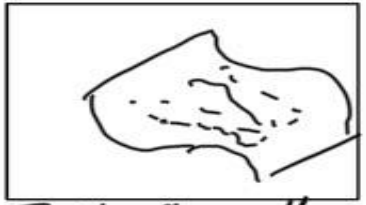
Generative embroidery



choose a pattern start

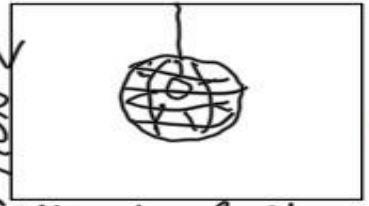


as the user moves their mouse, it will generate a pattern



I take the pattern & send it to the embroidery machine

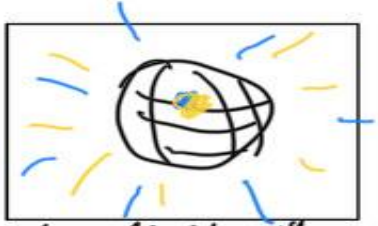
OPTION 2



Changing light

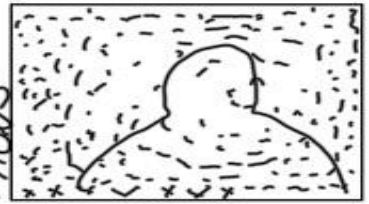
moving gradients of color

colors change depending on mouse position



the light will change based on the pattern

OPTION 3



Live video from webcam - computer vision

Differing overlay blocks out shape of user

Based on threshold

NOTES:
